Wiring Diagram

TYPICAL WIRING DIAGRAM FOR 777-KW/HP-P2 SERIES

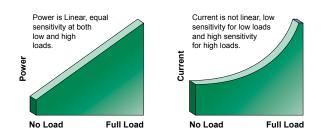

CURRENT TRANSFORMER WIRING DIAGRAM FOR 777-KW/HP-P2 SERIES

Description

The 777-KW/HP-P2 Series has the overload, voltage, phase loss and reversal, voltage and current unbalance, current and power monitoring*, and underload trip based on power in one package. The underpower trip feature is desirable anytime the current vs. load characteristic is non-linear or has little change. In general terms, smaller motors and slow-speed motors have little change in current over the normal load range. Larger motors that are running light loads will also show small current changes over the operating load range. For standalone applications, the units incorporate a 3-digit LED display that is used for programming, providing real-time operational information and displaying diagnostic codes to aid in troubleshooting a fault condition.

The units also feature a communications port that can be used with communication modules listed in the 777 accessories section to form a Modbus, DeviceNet[™], Profibus, or Ethernet network. Up to 99 units can be remotely monitored and controlled from a PC, PLC, or SCADA system, and data logging through a PC with the optional Solutions software.

* Low current trip and high power trip are network programmable only

Features & Benefits

FEATURES	BENEFITS	
Low and High Power Protection	Increases reliability for non-linear motors where the load characteristic has little change	
Built-in Display	Visual indication for programming, viewing real-time voltage, current, kilowatts, or horsepower, and last fault code	
Programmable voltage and current settings	Allows usage on wide range of systems	
3 selectable restart options	Choose from automatic, semi-automatic, or manual to best meet individual application needs	
	Program separate restart delay time for rapid cycle protection, motor cool down, and dry-well recovery	
3 programmable restart delay timers		
delay timers Remote display	protection, motor cool down, and dry-well recovery Increases safety through remote display of real-time data and fault history, without the need to open the	
délay timers Remote display compatibility	protection, motor cool down, and dry-well recovery Increases safety through remote display of real-time data and fault history, without the need to open the cabinet. Aids with arc flash safety regulations Reset can be done through pushbutton on relay or remotely with optional 777-MRSW or OL-RESET

777-KW/HP-P2 SERIES

Ordering Information

MODEL	LINE VOLTAGE	MOTOR FULL AMP RANGE	DESCRIPTION
777-KW/HP-P2	200-480VAC (3-phase)	2-800A (external CTs required above 90A)	Provides 480VA @ 240VAC output SPDT relay contacts
777-LR-KW/HP-P2	200-480VAC (3-phase)	1-800A (external CTs required above 9A)	Provides 480VA @ 240VAC output SPDT relay contacts
777-HVR-KW/HP-P2	340-480VAC (3-phase)	2-800A (external CTs required above 90A)	Provides 470VA @ 600VAC output SPDT relay contacts. Required when a CPT (control power transformer) is not used on a 480V system. Commonly used in pumping applications to save the cost and extra wiring associated with a CPT
777-575-KW/HP-P2	500-600VAC (3-phase)	2-800A (external CTs required above 90A)	Provides 480VA @ 240VAC output SPDT relay contacts. Used in Canada and NE USA where 575V utility power services are common
777-MLR-KW/HP-P2	200-480VAC (3-phase)	0.5-21A and 40-740A with external CTs	Provides 480VA @ 240VAC output SPDT relay contacts. It is wired directly without the need to loop conductors for 5-21 amps (under 5 amps requires looping of conductors), and can be used with external CTs for 40-740 amps

Accessories

RS485MS-2W Communication Module

(for limited Modbus capabilities) Required to enable the Modbus communications function on Model 77X-type products.

CIO-MB/CIO-120-MB Communication Module Modbus-RTU interfaces capable of providing discrete control and monitoring of an overload relay over a Modbus network.

CIO-DN-P/CIO-120-DN-P Communication Module

DeviceNet[™] interfaces capable of providing discrete control and monitoring of motor starters, drives and other devices over a DeviceNet[™] network.

CIO-777-PR Communication Module Profibus interface capable of providing discrete control and monitoring of motor starters, drives and other devices over a Profibus network.

Communication Adapters

RS485-RS232–Converter with cable & plug
RS485-USB–Converter with cable & plug
RS232-USB–Converter

Specifications match industry standard.

RM1000 Remote Monitor

The RM1000/777 motor management system combines unsurpassed electronic motor protection and critical, user-friendly, motor monitoring for up to 16 devices.

RM2000 Remote Monitor The RM2000/777 motor management system combines unsurpassed electronic motor protection and critical, user-friendly, motor monitoring with event storage and real-time clock for date and time stamp.

Solutions Software: Solutions-M Software features include data logging, real-time data monitoring and fault and event monitoring.

777-MRSW Manual Remote Reset Kit Allows the 777 line of MotorSaver® and

OL-RESET Manual Remote Reset Kit Allows the 777 line of MotorSaver[®] and PumpSaver[®] products to be manually reset without opening the panel door.
